Dangerous
Chemicals**

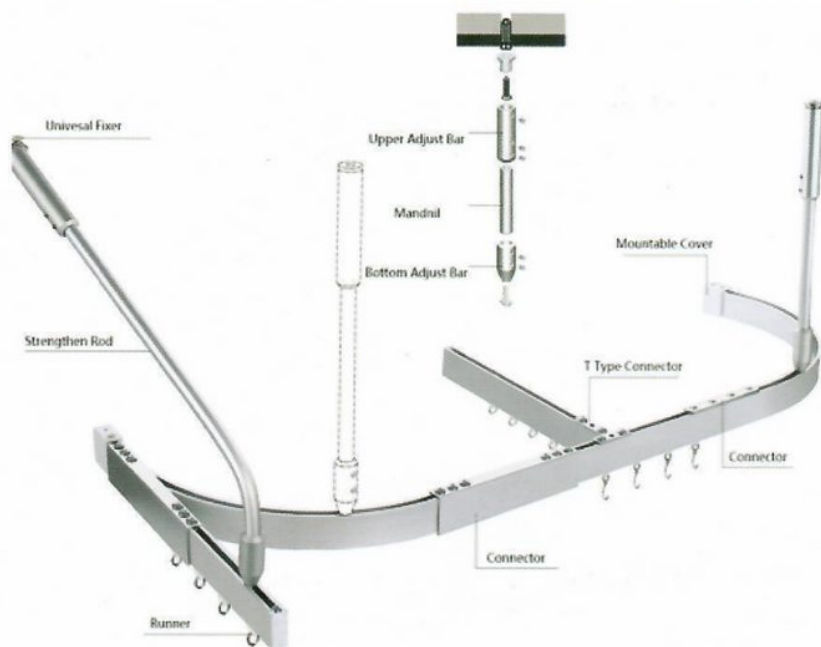

Hospital Tracks

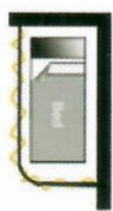

Hospital tracks, used for various applications within healthcare facilities (e.g., curtain tracks, rail systems for medical equipment), are increasingly being manufactured from advanced materials like aluminum and polyoxymethylene (POM). These materials are chosen for their beneficial properties in the demanding clinical and hospital environments.

Our Clinical solutions come with the following features

- *Aluminium Tracks with polyoxymethylene accessories*
- *Customizable Hanging rods that go from 0.7 metres to 6 metres*
- *Easy to Instal and Easy to maintain*
